Step by step procedures are listed below:

In the home screen click on **Setup – Settings.**

On the right hand side click on **Company** - **Sales Taxes** - **Taxes**.

You should now be in the **Settings** screen.

In Tax Colum indicate the tax name. GST or PST

In **Tax ID included on forms**. Type in the registered GST and PST number. This will show up on the sales invoices.

In the Exempt from this tax and Is this tax taxable Colum indicate No.

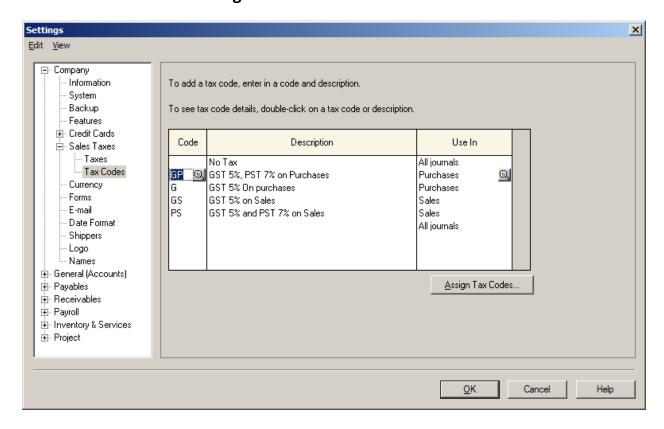

Account to track tax paid on purchases enter the account number from the chart of accounts.

Account to track tax charged on sales Enter the account number from the chart of accounts.

Report on taxes, indicate Yes.

Now click on **Tax Codes** on the left side of screen.

You should now be in **Settings** screen and it should look like this.

This example shows the PST and GST separately and the same format can be copied for other provinces with appropriate tax percentages.

GP = GST and PST

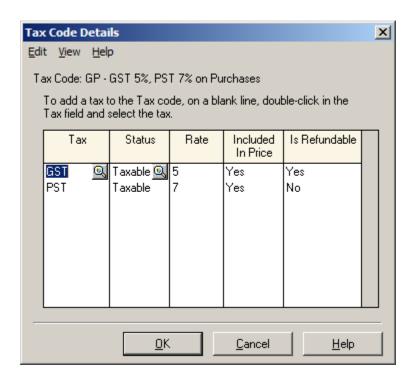

G = GST

GS = GST on Sales

PS = PST on Sales

After you have filled in the columns click on the magnifying glass located on The **GP** code.

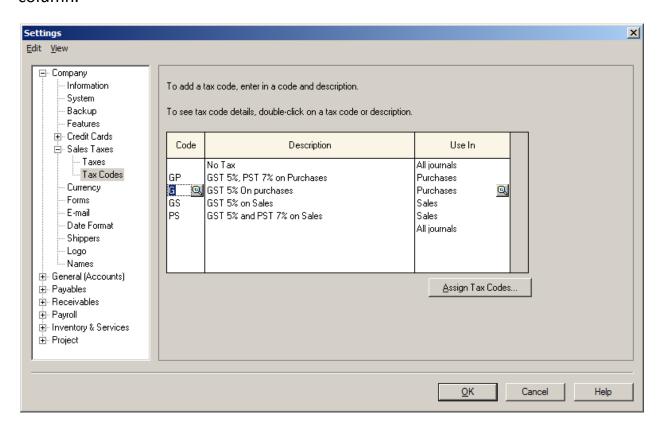

You should be in the **Tax Code Details** screen.

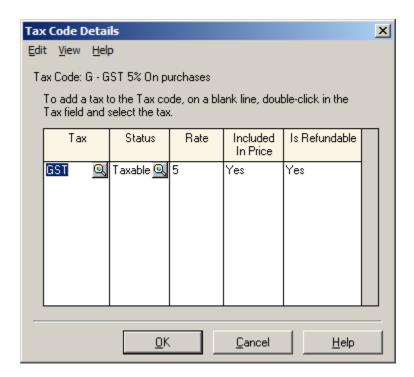

Fill out the tax, Status, Rate, Included in Price and is Refundable columns as shown above.

Press **OK** to save.

You are back at **Settings** screen. Go down the list and pick the **G** in the **code** column.

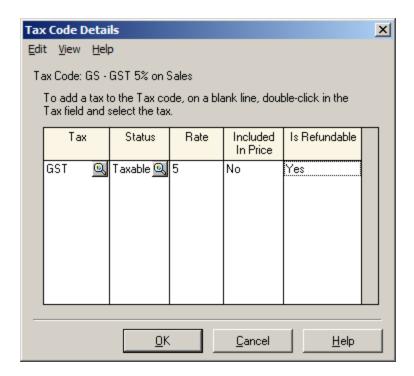

Click on the magnifying glass beside ${\bf G}$ in the Code Colum.

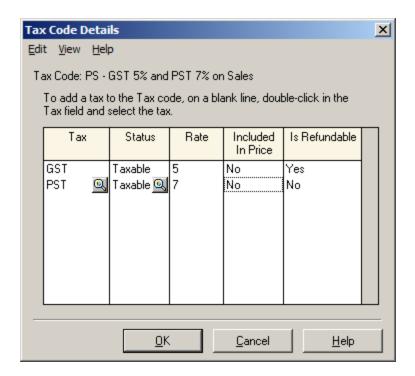

Fill out the tax, Status, Rate, Included in Price and is Refundable columns as shown above.

Press **OK** to save. You are back at Settings screen. Go down the list and pick the **GS** in the code column.

Fill out the tax, Status, Rate, Included in Price and is Refundable columns as shown above.

Press **OK** to save. You are back at Settings screen. Go down the list and pick the **PS** in the code column.

Fill out the tax, Status, Rate, Included in Price and is Refundable columns as shown above.

Press **OK** to save. You should be back to Settings screen. Click **OK** and accept all changes.
